HQ REPORT

Fuel is at a premium so plan the shortest route. Avoid major roads where possible, the enemy has these covered. Pre hunt intelligence has identified enemy security weakness at 6 locations and provided "Green Routes" to enable safe passage. Information on these will be given at the briefing. There is no information available at this time on the status of the remaining 15 destinations. The use of Satellite Navigation equipment is discouraged as the enemy can home in on the heat signature given off from such equipment. The soldier that returns with the most intel will be promoted. A map is essential and camouflage attire is optional!

Good luck.
